

Klove Radio Station is an asset to a world wide community. The positive and encouraging nature of this station offers a negative world a much needed break from the constant bombardment of bad news world wide. Suicides have been prevented. Bad days have been turned around. It is nice to have a radio station that is not full of shock and questionable content. I as well as my family especially value this radio station and there is much evidence that the good that it brings to the public is very beneficial. This is the only rated G radio station available to us.
